## Garden pots & planters and vegetables planters Garden Steel

A garden planter is an improvement to your garden. Arrangement is more simple and pleasant. GARDEN STEEL products are a combination the best features of sheet metal with a modern outline, which in effect gave us minimalist, light design. Specially designed by us shape of individual elements is very resistant to buckling.

The product is made of stainless steel, reinforced with legs made of galvanized profiles, powder coated. A wide selection in the range of size, colour and simple design allow for individual customization of pots and planters for every garden. Ideally suited to a representative part of the garden as well as in a greenhouse.

A greenhouse, a terrace, a balcony or a backyard place for a garden is an ideal location for the use of our vegetables planters. Its ergonomic design allows the user to enjoy working with plants without unnecessarily burdening the spine, and the material which it is made of provides protection against weather conditions. We have extended the basic package with the option of ordering a garden planter with the bottom. This option is applicable for example for indoor use.

More information about dimensions you can find on the following pages of the catalog.

### Why is it worth choosing our garden planter

and vegetables planter?

- » protects flowers and vegetables against pests, e.g. snails
- » quality of the soil in the garden does not matter
- » makes easier access to vegetables and flowers, they grow higher, making work more pleasant
- » protects plants against accidental trampling
- » the garden planter and the vegetables planter are made of sheet metal, making them durable and lightweight, allowing them to be mobile and enjoyable use of our
- » the products have the necessary approvals and the declaration of conformity and performance
